DeskCenter[®]
Management Suite

Implementation of the DeskCenter Management Suite

To guarantee a trouble-free service of the IT-infrastructure and to handle an effective system management for more than 1.100 clients in Germany and abroad, AirPlus IT specialists were searching for a suitable solution. Different applications were tested intensively. DeskCenter Management Suite could prevail because of its attractive price, the intuitive usability and the excellent functionality of the modules Inventory, Software Asset Management and OS Deployment. A decisive argument for DeskCenter also was the support with ThinApp by running virtualization processes.

The holistic solution was ready to use in a very short period and productive for a comprehensive system management. „We are totally satisfied with the variety of applications of DeskCenter Management Suite. The Hard and Software Inventory, the Software Asset Management and the support with ThinApp using virtualization meet exactly our expectations“, Anja Gronkowski, Associate Director of the AirPlus user support center appreciates the product.

The high safety regulations for financial service providers are essentially supported by DeskCenter Management Suite. The solution fulfills the high quality standard which the company has committed itself to.

With the help of the implemented agent, more than 80% of the whole IT-infrastructure could be gathered within few days, what is pretty remarkable for a global enterprise like this.

Furthermore the IT department is very happy about the comfortable energy management module. PC systems can be started and shut down automatically and the sensitive data also is protected against uninvited access. The energy cost savings make DeskCenter Management Suite a ideal solution of great value.

„With DeskCenters solution we feel provided very well. Both our wishes for data security and the legal safety regarding to license management are fulfilled“, said Anja Gronkowski convinced.
