

➤ Manage all of your mobile devices

easy and secure in one central platform

Mobile workstations must be integrated into the IT infrastructure and managed reliably and efficiently. But how do we ensure without additional manual work that the right software is installed on your employees' devices and everything is configured correctly? Can you ensure that personal data is protected from third parties in the event of loss or theft?

With Deskcenter Mobile we are able to automatically determine the user profile, email account, VPN and WLAN accesses automatically for all of your mobile devices. In addition, you can determine which apps a user group may install with a few clicks. With the aid of Deskcenter Mobile you are also able to undertake actions for rule infringements such as blocking the device and preventing the user from accessing company resources. If a device is lost or stolen with our MDM solution you can remotely block mobile devices and delete all of their content.

Secure and GDPR compliant

Flexible implementation via cloud and on-premises

Separation of private and business data

Simple for users and administrators

Quick registration of devices

Functions

- » Management and inventory for all Android and Apple devices
- » Provision and plannable control of applications, operating system and software updates, patches and configurations
- » Deletion of company data if the device is lost or stolen
- » Highest possible data protection through encryption and password queries
- » Creation of detailed reports on individual devices
- » Secure messenger app for secure chatting

Implement “choose your own device” and **“bring your own device” easily**

CYOD and BYOD are terms that still bring a sweat to the brow of many IT managers and companies. However, the restructuring is not difficult if you have the right partner on your side. By strictly separating private and business data on the mobile device, you offer your employees the greatest possible flexibility and comfort for their daily work. We support you in integrating or converting to mobile business devices and thus accelerate progress in your company.

Benefit from the service of our **experienced MDM experts!**

The introduction of an MDM solution should be as quick and easy as possible. Our MDM specialists are at your side at all times with their expertise. We take on the installation (on-premises) or set-up (cloud), system updates as well as the risk and security analysis. Take a step back and get comprehensive training from our experienced consulting experts after implementation. This is how you manage your mobile IT infrastructure completely independently and securely in the shortest possible time. Make a personal appointment with our MDM experts.

We are happy to advise you!
